Saturday Interhospital Meeting

Date: 16th May 2020

Venue: Seminar Room, 9th Floor,

Main Clinical Block and Trauma Centre, PWH

Time: 8:30-10:00

Although the HKSSH annual congress on 16th May 2020 had been cancelled, the HKSSH continues to provide continuous education on hand surgery for members and trainees. We hosted the Saturday Interhospital Meeting on 16th May, 2020 with the topic "Distal radius fracture – think out of the X-ray Box". It was the first combined "face-to-face" and "online" Saturday interhospital Meeting hosted by the HKSSH. Three cases of distal radius fracture and its related soft tissue injury had been presented, these include 1) Extensor pollicis longus (EPL) tendon rupture; 2) Scapholunate (SL) ligament injury; 3) Triangular fibrocartilage complex (TFCC) injury. The meeting has been very successful in arousing the awareness of orthopaedic surgeons about soft tissue injuries associated with a common injury, the distal radius fracture.
